Sustainable IT Services and Energy Solutions

SilTek is a Woman-Owned Small Business delivering innovative, best-value technology services and solutions to help enterprises manage their resources. For more than 15 years, we have solved customer challenges with the design, development and management of engineering solutions. Our development and delivery model infuses sustainability into all of our offerings – resulting in cost savings for our customers. We recognize our federal and commercial customers are being asked to accomplish their missions with increasingly fewer resources. Our innovative tools and proven management expertise deliver quality solutions to address the most difficult customer challenges.

IT SERVICES

More than 15 years ago, SilTek architected and built the world's first integrated cost estimating and budgeting system. Today, our talented engineers, analysts and program managers continue to help customers control costs, optimize processes, and manage risk through innovative technology implementation and best practice project management.

ENTERPRISE ARCHITECTURE

Organizations need effective strategies to deal with complexity and manage change. Our unique, value-added approach to implementing EA involves integrating sustainability strategies into your enterprise's business strategy to achieve future state objectives. We demonstrate the value of sustainability in achieving positive bottom-line results.

ENERGY CONSULTING

Enterprises increasingly want to optimize energy production and lower costs. SilTek offers broad expertise in energy management and technology. Our energy consulting services help enterprises assess energy consumption and enable rapid deployment of sustainable, efficient, cost-effective, and reliable energy systems.

SUSTAINABILITY

Sustainability is a rapidly emerging concept that requires a long-term focus. SilTek helps enterprises define and implement sustainable strategies that align with business objectives – while increasing efficiency and reducing operational costs. We strive for solutions that deliver sustainable economic, social, and environmental benefits.

SilTek's specialized team of systems engineers, systems development, and certified enterprise architects experts are experienced in providing software engineering, financial management, and transactional and data intensive expertise, as well as analysis and governance support in renewable energy technologies. We support our customers' operational missions through products and services that deliver value for organizations through more efficient operations and cost savings.

Let SilTek solve your enterprise's most complex problems.
