

An Architected, Automated Enterprise Budget Management System

AUTOMATED BUDGET TOOLS

Use your budget in real time. Immediately track the impacts of decisions on future performance and costs. Manage your programs with agility using integrated workflow and alerts for quality decision support and financial integrity.

CLOUD-BASED & SECURE

Software as a Service offers a lower cost solution to owning software. Efficiently and cost-effectively meet your infrastructure and security needs with an architected system built for scalability and flexibility to support enterprises of all-sizes.

AUDIT READY

Ensure your budget is in a state of financial audit readiness at all times. iforea™ integrates and implements traceability, accountability, reliability, and strategic priorities across the enterprise providing real time, quality data from estimates to execution.

SUSTAINABILITY INDEX

Maintain a balanced budget while preparing for future compliance. Sustainability Indexing™ projects your budget's out-year environmental, economic, and social performance using reliable, engineered cost models.

KEY FEATURES

Does your budget represent your future business strategies? Does it save you money? iforea™ ties your strategies directly to the bottom line while providing the most cost effective solution to automate and manage your budget. Eliminate spreadsheets, ad hoc systems, and guesswork and use a dynamic enterprise budget platform to deliver solid financial projections from reliable data. Enable support from the bottom up and decisions from the top down with a living budget that integrates engineered cost models with active schedules.

Take the guess work out of ROI and simple payback projections while simultaneously implementing sustainability across the enterprise. iforea™ estimates the return on investment, cost and time to complete, and projects performance before and after each investment to determine economic benefits. It provides quick, automated input for doing business case analyses. iforea™ facilitates budgetary decisions affecting your enterprise's performance using sustainability metrics to improve performance *now* – and *in the future*.

SOLVE BUDGETING CHALLENGES

- Automate budget programming
- Reduce preparation time and cost
- Significantly increase data quality
- Align budgets with enterprise strategies
- Refactor budgets as strategies change
- Optimize programs to maximize value
- Manage project execution
- Track budgets in real time

Spend less time, get more value!

Transform your enterprise with the cloud-based, secure, and dynamic budget system that provides sustainable, bottom-line results

Based on more than 15 years of enterprise budgeting experience, iforea™ reduces time and overhead and quickly produces financial plans in a flexible, adaptable solution. Users build reliable estimates with advanced modeling capabilities and minimal input to project future requirements, track sustainability metrics, and analyze "what if" scenarios. iforea™ consolidates data and requirements across the enterprise, and aligns budget expenses with corporate goals and strategies.

iforea™ represents more than 15 years of budget automation and execution experience supporting large enterprises including the U.S. Department of Defense. As an architected solution, iforea™ has a proven track record of dramatically improving budget data quality while driving down overhead costs, improving workflow, and shrinking the time required to prepare financial planning documents. iforea™ will transform your budget process and data into an actual management asset.
